Collateral report: Factory unit (placeholder), Sanand GIDC area, Bol village

Industrial land and building · 8,000 sq m · Bol, Sanand taluka · 22.9883, 72.2626 · survey no. not supplied · as of 2026-10-31

Summary. Industrial land and building of 8,000 sq m in Bol, Sanand taluka. Estimated value Rs 3.98 crore to Rs 7.24 crore. After a forced sale the lender would net about Rs 3.19 crore. Suggested loan-to-value 66% to 75%.

Rs 3.98 crore – Rs 7.24 crore	Rs 3.19 crore	66% – 75%	63 / 100
Value range (80%)	Realisable value after forced sale	Suggested LTV band	Activity Index

Red flags (1)

- Night-time activity is 21% below the previous 12-month average.

Valuation vs jantri

Central estimate Rs 5.37 crore (Rs 6,713 per sq m), with an 80% range of Rs 3.98 crore to Rs 7.24 crore. The jantri value is Rs 3.83 crore, so the estimate is 1.4 times jantri.

Liquidity and realisable value

Chance of sale within 180 days of a bank auction listing: 42%. Expected cut from the first reserve price: 27%. Time to sale: a median of 199 days from listing. Allowing 1.5 years to cash, a 5% recovery cost and 11% cost of funds, realisable value is Rs 3.19 crore, or Rs 2.36 crore at the low end of the value range.

Expected loss and LTV

Requested loan Rs 3.00 crore, which is 56% of the central value. With an assumed 12-month default probability of 6.0%, loss given default is 0% (21% stressed) and expected loss is 0.00% of the loan. The LTV band keeps expected loss under 2%.

Title and boundary health

Land record (7/12, 8A)	No land-record document supplied.
Boundary check	Record 8,000 sq m vs observed 8,888 sq m (11.1% gap), overlap IoU 0.89. Within tolerance (flag if IoU < 0.70 or area gap > 15 %). *Record polygon is a placeholder square; observed polygon is synthetic. Live: Bhu-Naksha or a digitised parcel vs Fields of The World.*
Court disputes	Not checked. eCourts data not collected; see data/templates/ecourts_cases.template.csv
Registered charges	Not checked. CERSAI is a paid per-search service; not queried.

Hazards

Flood history is low (surface water in 0.9% of observed months). Extreme heat is moderate (48 days a year above 40 C). Rainfall variability is low (0.27).

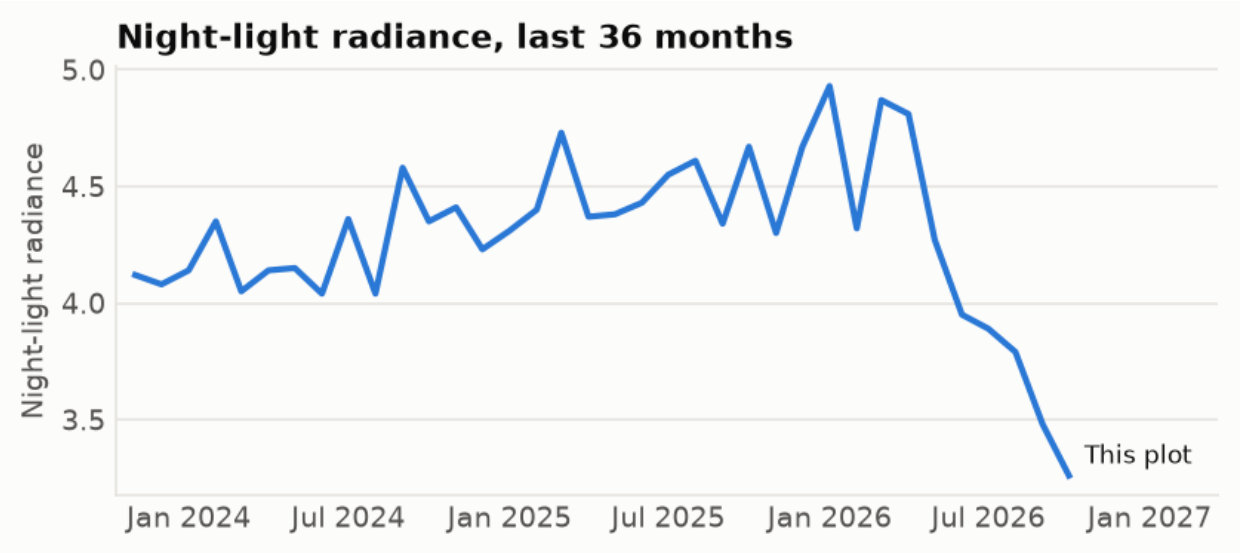

Access and repossession

Nearest drivable road is 0.2 km away; Sanand town is 11.7 km and Ahmedabad 31.9 km in a straight line. Repossession access looks easy.

Area score: village 71.3 / 100 (distance to roads (+9), flood history (+3)); Ahmadabad district 60.2 / 100.

Pulse: monthly monitoring

Activity Index 63 out of 100. Night-time activity is 21% below the previous 12-month average. Scripted demo event: activity fades by about a third over the last six months.

Limitations

- SYNTHETIC DEMO: only the district and village boundaries are real. Satellite layers, auction listings, jantri rates and credit data are generated stand-ins, so every figure here illustrates the report, not the property.
- The plot location is a placeholder point, not a surveyed parcel.
- Default probability is a lender-set assumption until a partner loan book is used.
- Time to cash adds an assumed one year from default to first auction.
- No land-record document, court search or CERSAI search was run.
